

SUMMARY

This survey obtains student opinions about subject specific support, including specialized research assistance they may have received from multiple encounters with a librarian.

A brief online survey distributed by email at the end of the semester in which they ask their librarian for help provides students with the opportunity to:

- evaluate their librarian's service and expertise after a project's completion rather than shortly after the interaction
- Emphasize what was most helpful from their encounters
- Assess and reflect upon their overall research process and perform a final stage in constructivist learning when answering, "What advice or information related to your research assignment do you wish someone had given you sooner?"

In addition to giving customer feedback, the survey results help the librarian to:

- Set priorities for which skills and strategies to emphasize in future transactions
- Describe the skills, tips and topics typically covered
- Quantify the major formats where reference services are provided
- Collect tangible advice to use for future students engaged in similar research assignments.

Coupled with library instruction evaluation surveys, this instrument provides a more rounded and customized view of students' needs throughout their research process.

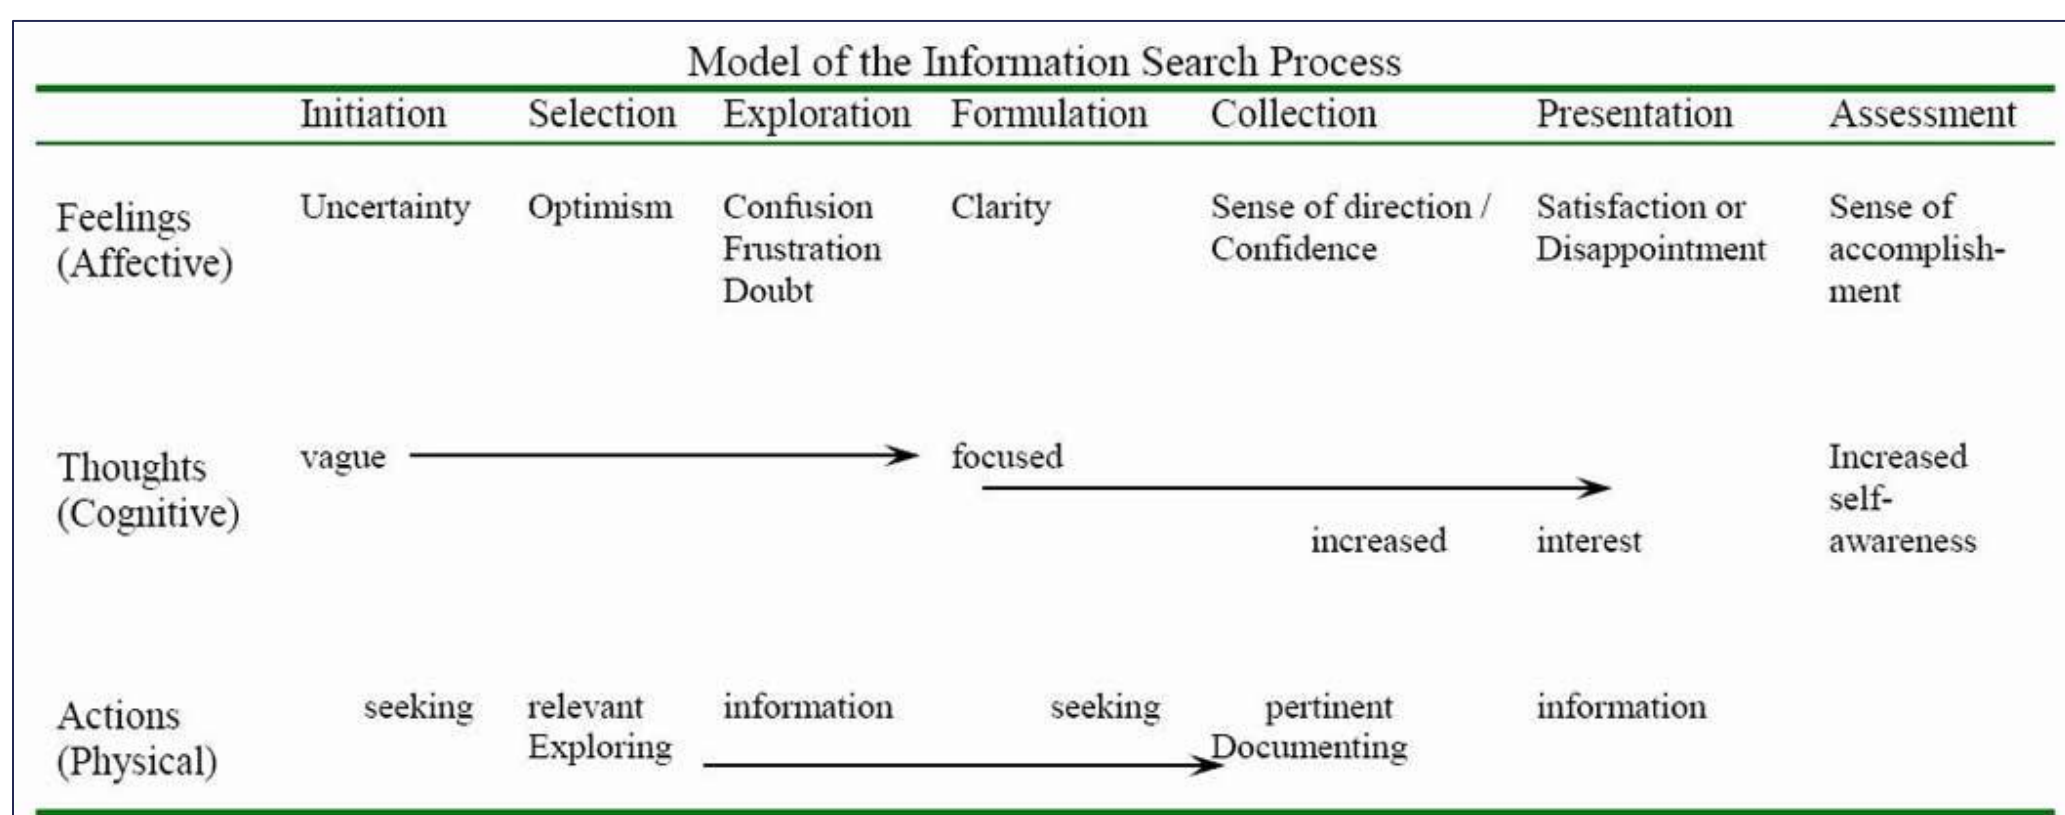

The REFERENCE/ INSTRUCTION CONNECTION

Increasingly, academic reference and instruction librarians develop relationships with students that begin in instruction sessions and extend through the duration of research projects.

Library instruction increases reference traffic (Saunders, 2003), and it likely increases student demand for follow-up consultations with librarians who know their courses, assignments, and particular research needs.

In addition, librarians learn how to improve their instruction after follow-up reference interviews with the students they have taught.

SELF ASSESSMENT IN LEARNING & TEACHING

Carol Kuhlthau's model of the *Information Search Process* (2007) includes 7 stages, including a final assessment stage where students reflect on their whole research process and consider:

- What they have learned
- What problems they had along the way
- What they will do in the future

This survey provides an opportunity for students to assess themselves and their experience formally in questions 3 and 6.

Because the survey is NOT anonymous, the librarian can...

- Quote the tangible advice in workshops for future students with the same assignment
- Compare what the student remembered with what the librarian covered

The SURVEY INSTRUMENT

A brief online survey is sent to student emails via the Library's Survey Monkey account at the end of the semester.

San Francisco State University
Leonard Library
Welcome to your university Library

Please provide some feedback on your research consultation with librarian [insert name here]. Your answers will be used to improve library services in the future.

1. How did you learn about this research assistance service?

- Met the librarian in a class visit/workshop
- Research guide/ libguide
- Referred by a professor
- Referred by another librarian
- Library web site or directory
- Other (please specify): _____

2. Which statements best describe the nature of your research consultation with [insert librarian's name]?

	Agree	Neutral	Disagree	Not Applicable
She was responsive to my requests for assistance.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
She understood what I wanted.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
She listened to or carefully read my questions and concerns.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
She had sufficient knowledge of the subject to help me.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
She asked me useful follow-up questions.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
She was courteous and considerate.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The time she took with me was suitable.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

3. Which statements describe what you learned from your research consultations with [insert librarian's name]?

	Agree	Neutral	Disagree	Not Applicable
She taught me how to get the most out of the library.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
She helped me find sources I couldn't find on my own.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
She taught me how to be self-sufficient with my research in the future.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
She helped me understand my assignment better.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
She helped me organize my ideas.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
She helped me get a better grade.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

4. By which methods did you communicate with [insert librarian's name]? (choose all that apply)

- Library instruction (classroom/workshop)
- In person meeting
- Email
- Instant Messaging (Meebo, Google Chat, etc.)
- Telephone

5. Check which aspects of library research you discussed with [insert librarian's name].

- Search strategies
- How to use the library (Requesting books, Link+, illiad)
- Where to look for information (suggested databases)
- Specific resources (book titles, articles, experts, etc.)
- Defining the topic
- Organizing notes and sources
- Outlining the paper and/or structuring arguments
- Writing citations
- Reviewing the professor's feedback

6. What advice or information related to your research assignment do you wish someone had given you sooner?

7. What was helpful about your research consultation with [insert librarian's name]? Please describe.

8. What would have been more helpful? How could have [insert librarian's name] improved her/his research consultation with you?

THANK YOU FOR YOUR TIME AND COMMENTS!
Good luck with your research in the future.

2. Which statements best describe the nature of your research consultation?
=
Customer Satisfaction
+
Helps librarian manage time during future interviews.

3. Which statements describe what you learned?
=
Self Assessment
+
Customer Satisfaction
+
Shows the librarian what students found most important.

6. What advice or information related to your research assignment do you wish someone had given you sooner?
=
Advice for future students
+
Self Assessment

Answers have included:

- "Don't procrastinate."
- "Seek help sooner."
- "The answer was always there, I just needed to ask."

1. How did you learn about this service?
=
Marketing + Publicity
Instruction
=>
More Reference

- ~75% of students learned about the service in a library instruction session.
- Most of the rest were referred by a professor.

4. By which methods did you communicate?
=
Measures reference formats
+
Prioritizes where to provide future service

5. Which aspects of library research did you discuss?
=
Students remember what was important + effective

7. What was helpful?
8. What to improve?
=
Quality Feedback

The library instruction evaluation survey for students includes similar questions.

- Responses have emphasized the importance of:
- Prompt communication
 - Librarian's subject knowledge
 - Written takeaways

DISCUSSION QUESTIONS

- How do you evaluate reference service at your library?
- How do you evaluate specialized research assistance?
- When do you solicit feedback for your services?
- Does library instruction increase reference traffic at your institution?

REFERENCE EVALUATION

Most reference service evaluation focuses on patron impressions of reference service shortly after their encounters. Much of the recent assessment instruments and discussions have focused on measuring the value and effectiveness of virtual reference service and describing the complexity of reference questions (McLaughlin, 2011). In most cases they suppose a semi-anonymous exchange between a service provider and patron.

The California State University system uses a modified Warner model (2001) for classifying reference statistics by focusing on the level of skill and the strategies used. This is helpful in considering library staffing, but it does not measure the relationship between library instruction and research assistance.

Off Desk Transactions	In-Person	Email	Phone	Virtual/Chat/Text
Name:				
Date(s):				
Level 1 is a non-resource based question (Directional)				
Level 2 is a Skill-based question (usually Technical Skills: how to use the catalog)				
Level 3 is a Simple Strategy based question (finding an answer to a specific reference question including subject searches)				
Level 4 is Complex (generally, a Consultation involving evaluation and/or "how to" requiring multiple answers or multiple resources)

Special thanks to Paul Jackson (Leonard Library) for the images in this poster.

HOW IS THIS SURVEY DIFFERENT?

1. Connects reference to library instruction
2. Is NOT anonymous
3. Obtains patron feedback at the end of a research project
